# Internet Safety at Home

internet safety

The internet can be a great place. I can find information, learn, have fun and connect with my friends.

I need to be aware of the amount of time I am using the internet. I will get headaches and sore eyes if I am on it too long.

When I'm online, it's important that protect myself and not give out any of my personal information.

I will keep things like my picture, name, address, phone number, passwords, or my city to myself, and not post them online.

internet

I will stay safe by telling one of my family members or staff, if I feel uncomfortable by something or someone online. They can help me to know what is safe and unsafe. They care about me and what me to feel safe and happy.

The internet can be a great place, and I will be safe online while having fun learning new things and connecting with my friends.
